

**For HealthMETRICS, we designed software that helped
nurse their clients back to financial health.**

DM&P Information Systems was just what the doctor ordered to help HealthMETRICS implement their best practice strategies.

When the healthcare experts at HealthMETRICS needed help implementing their best practice strategies, they hired the experts at DM&P Information Systems.

DM&P Information Systems created proprietary software that provides HealthMETRICS clients with important cost accounting information – and gives HealthMETRICS a valuable competitive edge.

We also set up for HealthMETRICS a complete network as well as e-mail and database systems. And to be sure their server does its job, HealthMETRICS relies on DM&P Information Systems for administration and support.

DM&P Information Systems has helped make HealthMETRICS' bottom line healthier than ever. What could we do for your organization? Find out. Call **1.800.838.7188** or e-mail **info@dmpsys.com** for more information and a no-obligation consultation.

We did a bang-up job
creating an inventory tracking system for **Atlantic Blasting.**

Atlantic Blasting was blown away when they saw how DM&P Information Systems made them more efficient.

Inventory tracking is a big deal when the inventory includes powerful explosives. So when Atlantic Blasting wanted a more sophisticated inventory tracking system, they turned to DM&P Information Systems.

We developed custom software for Atlantic Blasting that ensures materials are accounted for to within 1/1,000 of a pound, meeting the company's strict internal standards.

And because manual calculations were eliminated, DM&P Information Systems helped Atlantic Blasting be more efficient and productive.

DM&P Information Systems had a big impact on how things get done at Atlantic Blasting. What could we do for your organization? Find out. Call **1.800.838.7188** or e-mail **info@dmpsys.com** for more information and a no-obligation consultation.

AmeriFee probably wouldn't be the leader in patient financing if we hadn't cured its paperwork problem.

Thanks in part to **DM&P Information Systems,** AmeriFee Corporation grew up to be big and strong.

When DM&P Information Systems first began working with AmeriFee, the patient financing leader was not yet a subsidiary of Capital One Financial. At the time, AmeriFee had only 12 employees and was processing loan applications manually, with lots of key stroking and wasted paper.

DM&P Information Systems automated AmeriFee's loan approval process so successfully, AmeriFee was able to go from processing 75 applications a day to upwards of 1,300 a day. And as AmeriFee's business continues to grow, it will be easily accommodated by the system designed by DM&P Information Systems.

DM&P Information Systems helped AmeriFee develop from a small business to a corporate leader. What could we do for your organization? Find out. Call **1.800.838.7188** or e-mail **info@dmpsys.com** for more information and a no-obligation consultation.
